**English translation:**

University student: The educational method in Kabul University is very old. The world has advanced a lot. There is lots of advancement. Technology has advanced, but our educational system is very old. All students sit on chairs that are not useable at all. The chairs don't even have backs. Also we lack projectors, computers, teaching boards, good teaching methods, good lectures and all that. And the library in Kabul University, where we go and look at the books, doesn't give access to all books. We have to go... we have to go to the public library. Another problem is that Kabul University doesn't have any good place for studying. If you go around Kabul University, all around it, there is no place for a student to sit down and study. There are no chairs, no places for having good study periods, places where one can feel comfortable.
