K: Well, what can you say about Bukhoro State University? Is it a big university? How many students are there? What majors are there?

M: Bukhoro has only one University. Our university is very big. The campus is very big. [It] has many buildings, academic buildings, departments...several. We have Agrarian, Economics, Russian Philology, Philology department, Chemistry -Biology department... Well, there are very many departments, and as I know this year they are opening a new Tourism department as well; because tourism is developing in our country. And the students, to tell the truth I am afraid to make a mistake, maybe there are five thousand, maybe more than that...it must be more, hmmm...

K: I see, in fact, are there no higher education institutions in Bukhoro?

M: There are, we have a medical institute. Then there is a technological institute.

K: Why did you choose the University?

M: Hmm, well, I do not know, medical institute prepares doctors. Becoming a teacher, I wanted of course... but I did not have the intention to study for seven years. Technology [institute], it think impossible to go there without Mathematics [knowledge of math], and that's why, only university has foreign languages, that's why I came to the university.

K: In the future, your plans for the future?

M: I have a lot of plans, I always make some plans. First of all graduating from the university and getting my diploma. Then I want to continue my education. Now I will have my bachelor's degree and then I want to study for my Master's, but I want to get my Master's abroad. I know our educational system, that's why I want to try how it is in other countries.

K: Well, could you tell us about the education system in Uzbekistan? The sphere of education?

M: Nowadays the education system has changed a bit. Now children finish ninth grade and they go either to lyceums or colleges. Well, the students who go to lyceums get certificates and can continue their education at the university or other higher educational institutions. The students who finish colleges, usually, they learn some trade and get a diploma too. They, for example, after graduating from college, can get a job.

K: Where did you study?

M: I studied at the lyceum.
